AUTHOR INDEX

Benisek, L.
Realistic and Fair Flammability Test Methods for Upholstered Seating, p. 239

Brown, S. A.
Flame Retardance as a Criterion Textile Product Evaluation: A Conjoint Analysis Approach, p. 221

Crown, E. M.
Flame Retardance as a Criterion in Textile Product Evaluation: A Conjoint Analysis Approach, p. 221

Damant, Gordon H.
Rate of Weight Loss as an Aid to Evaluate the Smoldering Propensity of Upholstery Fabrics, p. 89

California Upholstered Furniture Combustibility Standard: 1981 Update, p. 209

Bibliography of Published Information on Furniture Flammability, Part 3, p. 235

Dardis, Rachel
Economic Analysis of a Flammability Standard for Adult Clothing, p. 16

Eicher, W. J.
Flexible Polyurethane Foam for High Risk Occupancies, p. 189

Fisher, Lynn D.
Evaluation of Three Types of Flame Retardant Children's Sleepwear Before and After Home Use, p. 169

Gray, Joan K.
Effects of Education and Other Factors on Consumers' Priorities for Flame Retardant Protection in Apparel Fabrics, p. 144

Hilado, Carlos J.
Integration of Toxic Effects from Overheating Flexible Foam, p. 49

Smoke and Toxic Gases from Materials in Healthcare Facilities, p. 65

Government Publications Relevant to Consumer Product Flammability, p. 183

Hometchko, D.
High Performance Polyurethanes: Correlation of Laboratory Data with Large Scale Fire Tests, p. 105

Hughes, Rhonda K.
Evaluation of Three Types of Flame Retardant Children's Sleepwear Before and After Home Use, p. 169

Huttinger, Patricia A.
Integration of Toxic Effects from Overheating Flexible Foam, p. 49

Smoke and Toxic Gases from Materials in Healthcare Facilities, p. 65

Government Publications Relevant to Consumer Product Flammability, p. 183

Kelley, Eleanor A.
Effects of Education and Other Factors on Consumers' Priorities for Flame Retardant Protection in Apparel Fabrics, p. 144

Laughlin, Joan
Photodegradation of Fibe and Finish in Flame Retardant Cotton and Polyester Fabrics for Work Garments, p. 77

McGee, Kay M.
Evaluation of Three Types of Flame Retardant Children's Sleepwear Before and After Home Use, p. 169

Murch, Robert M.
Testing of Mattress Core Materials Under Severe Fire Conditions, p. 3

Needles, Howard L.
Care of Flame Retardant Treated Fabrics, p. 27

Pauly, D.
High Performance Polyurethanes: Correlation of Laboratory Data with Large Scale Fire Tests, p. 105

Pcolinsky, M.
High Performance Polyurethanes: Correlation of Laboratory Data with Large Scale Fire Tests, p. 105

Rucker, Margaret H.
Evaluation of Three Types of Flame Retardant Children's Sleepwear Before and After Home Use, p. 169

Sanders, Erin M.
Evaluation of Three Types of Flame Retardant Children's Sleepwear Before and After Home Use, p. 169

Shabdue, Connie L.
Smoke and Toxic Gases from Materials in Healthcare Facilities, p. 65

Spivak, Steven M.
Extinguishability of Flammability Textiles: Part V. Further Studies of Air Flow, p. 35

Stone, H.
High Performance Polyurethanes: Correlation of Laboratory Data with Large Scale Fire Tests, p. 105

Stremel, Julie
Economic Analysis of a Flammability Stanard for Adult Clothing, p. 16

Sun, Robert L.
Extinguishability of Flammability Textiles: Part V. Further Studies of Air Flow, p. 35

Szabat, J. F.
Flexible Polyurethane Foam for High Risk Occupancies, p. 189

Tesoro, Giuliana C.
The Fire Safety of Upholstered Furniture: An Evaluation of the State-of-the-Art and Potential Improvements, p. 132

Williams, Sharon S.
Rate of Weight Loss as an Aid to Evaluate the Smoldering Propensity of Upholstery Fabrics, p. 89

Wortman, Pamela S.
Bibliography of Published Information on Furniture Flammabilty. Part 3, p. 235

Zeronian, S. Haig
Evaluation of Three Types of Flame Retardant Children's Sleepwear Before and After Home Use, p. 169

SUBJECT INDEX

Apparel fires, p. 35, p. 144

Bleaching, p. 27

Children's sleepwear, p. 169

Consumer attitudes, toward FR apparel, p. 144

Correlation, large/small tests, p. 105

cost benefit, flammability standards, p. 16

Economics of flammability standards, adult clothing, p. 16

Fabrics, p. 27

Flame retardance, in product evaluation, p. 221

Flame retardant, p. 27, p. 77

Flammability, p. 27, p. 77, p. 89

Flamability standard for adult clothing, economic analysis, p. 16

Flammable textiles, extinguishability, p. 35

Flexible foam, off gases, p. 49

Furniture filling material, p. 89

Furniture flammability, bibliography, p. 235

California, furniture standards, p. 209

Furniture standards, California, p. 209

High risk occupancy, polyurethane foam, p. 189

Home furnishings, smoldering propensity, p. 89

Hydrophylic urethanes, mattresses, p. 3

Large-scale fires, polyurethane, p. 105

Laundering, p. 27

Mattresses, testing, p. 3

Mockup systems, p. 89

Photodegredation, p. 77

Polyurethane foam, for high risks, p. 189

Product flammability, government publications, p. 183

Rate of weight loss, p. 89

Toxic gases, in healthcare facilities, p. 65

Upholstery fabrics, smoldering, p. 89

Upholstered furniture, fire safety, p. 132

Upholstery seating, flammability test, p. 239

Work weight fabrics, p. 77
